Agile Coaching
How Scrum Masters can up their game

Agile and Scrum have changed the way organizations think about doing work. The role of Scrum Master is key to a team's success, helping them improve their delivery and clearing their path. Moving from coaching teams to helping organizations transform is a daunting task. This course teaches how.

Using a hands-on, practical approach this course covers the skills needed to go from Scrum Master to Agile coach. Learn different techniques for scaling Agile, how to choose a scaling technique, impacts to budgeting and management, how to interface with traditional development departments, and how to work with executives to implement a cross-organization transformation.

Prerequisites: a solid understanding of Scrum practices and experience with Scrum teams

Length: 2 day

Customizations upon request

Topics

- How does Agile change at scale?
- Agile hybrids and their impact on delivery
